WORK EXPERIENCE

Worldwide Home Depot

Wordpress Developer

May 14, 2025 - Present

As a Full-Stack E-commerce Developer, I built and maintained a WooCommerce website, managing hosting, custom features, SEO, and product content. I developed tools including a 3D Tile Simulator, Tile Calculator, and many more, while improving site performance and product images. I also supported marketing events with QR registration forms, brochures, and price tags. These efforts improved the customer experience and supported sales growth.

ACRET

Software Developer

October 22, 2024 - April 21, 2025

I was responsible for implementing the client's desired design and ensuring the seamless maintenance of the application. Throughout this process, I regularly communicated with the Japanese project manager to align on project goals and requirements.

The team utilized Drupal CMS and PHP for the back-end, while I had the flexibility to work with any JavaScript framework of my choice, allowing me to bring my preferred approach to the front-end development.

Software Expert System

HTMLprogrammer/DataEntrySpecialist

November 2021 - October 2024

Responsible for creating and maintaining online courses, ensuring data accuracy, and enhancing the user experience through web design and implementation. Involves a combination of technical skills in HTML, XML, JSON and image editing.

In addition, I have gained experience in Quality Assurance (QA) by conducting manual testing of websites to identify and resolve issues, ensuring optimal performance and user satisfaction.

I also have experience with WordPress, handling tickets to maintain and update content, ensuring all information remains current and engaging.

APPRENTICESHIP

Universal Technology – (312 Hours)

Content Marketing Intern

Responsible for designing their websites to attract potential customers and direct them to their main website, with the use of wordpress and SEO to meet Google search standards.

Kredo IT Abroad – (312 Hours)

IT intern

Responsible for sending hiring templates for potential programming teachers via the LinkedIn application.

PROJECTS
